

FREDRICK AWUNTUBA.

Full-Stack Developer

CAREER OBJECTIVE

Detail-oriented Full-Stack Developer and Computer Science student with hands-on experience building production web applications end to end — from database design through deployment. Comfortable across the MERN stack and Next.js, with practical experience delivering both freelance client platforms and independent projects. Committed to writing clean, maintainable code and continuously expanding into new frameworks and tools.

WORK EXPERIENCE

Freelance Software Developer — USSD Voucher Platform — Client Project 2025

- Built a USSD-based platform for selling WAEC/BECE result-checker vouchers across Ghana.
- Integrated NALO Solutions as the live USSD/SMS provider for real-time transactions.
- Implemented CSV-based voucher upload and live price management via a React admin panel.
- Deployed backend to Render and the admin panel to Vercel, with MongoDB as the data layer.

Full-Stack Developer — DicesHub — Personal Project 2025

- Built and launched a full-stack t-shirt e-commerce platform from scratch.
- Implemented Firebase authentication, Paystack mobile money checkout, and a guest cart with login-gated checkout.
- Built a complete admin panel for product and order management.
- Resolved production issues including CORS configuration and cross-platform deployment quirks between Vercel and Render.

PROJECTS

Personal Portfolio — Next.js · TypeScript · MongoDB

- Designed and built a custom portfolio site with a MongoDB-backed projects and contact system, custom interactive UI, and a theme able dark/light interface.

EDUCATION

BSc in Computer Science

Kumasi Technical University

In Progress
